

# Senior Director, Occupational Toxicology

Affygility Solutions, a leading provider of occupational toxicology, industrial hygiene, and potent compound safety services to the life sciences industry is seeking a Senior Director, Occupational Toxicology to join our team. The successful candidate will join a team of experts with clients in over 47 countries.

<b>Job title</b>	<b>Senior Director, Occupational Toxicology</b>
<b>Location</b>	Flexible with the option to work remotely from home
<b>Schedule</b>	Full-time
<b>Travel</b>	Yes – less than 5%
<b>What you'll do</b>	<ul style="list-style-type: none"><li>• Lead our occupational toxicology team to deliver high-quality work products and service experiences that promote client loyalty.</li><li>• Develop into the subject-matter expert in occupational toxicology for the pharmaceutical industry, and partnering with key clients and other team members.</li><li>• Work collaboratively with other managers and leadership in cross-departmental projects and initiatives.</li></ul>

You will also have the opportunity to do your best work through the following:

- Research and preparation of occupational hazard classification reports for active pharmaceutical ingredients (APIs).
- Research, development, and preparation of written occupational exposure limits (OELs) and acceptable daily exposure (ADE) values for APIs.
- Prepare written justification reports on genotoxic impurities, residual solvents, and foreign contaminants.
- Provide hazard and risk communication training as necessary to clients.

## What qualification you'll have

At Affygility Solutions we place a premium on energetic, positive “can do” attitude people wanting to achieve high-performance, tackle tough-problems, and are comfortable with modern technology tools. Essentials skills include:

- Self-directed and ability to work independently from a remote location.
- Ability to manage multiple client situations, needs and inquiries simultaneously, and prioritize accordingly.
- Ability to mentor junior-level staff in a positive and encouraging manner.

- Ability to assemble and analyze complex data sets and prepare summary information in a manner that can be understood by non-scientific personnel.
- Excellent computer skills in Microsoft Office, including the ability to create complex tables and graphs.
- Experience working with computerized chemical and toxicology databases.
- Ability to use modern online communication and project management tools, such as Skype, Slack and Basecamp.
- Ability to provide technical presentations, both in-person and online, in clearly-spoken English and in front of moderate size groups.
- Ability to work flexible hours, including some early morning, evening and weekend work depending on international client needs.

In addition, ideal candidates will have:

- Pharmaceutical or other life science experience.
- Prior experience with leading small departments.
- Additional management or leadership training.
- Diplomate American Board of Toxicology (DABT) desired or the ability to obtain such designation within 1 year.
